

Example Ship Card

This is an example of a ship card generated from the webpage at <http://incblots.com/pratt> using the information in Rule 1 for the ship *La Argentina*. Note that some of the entries in the Damage List differ from Pratt's (see the note on page 11). Also, if instead of 9x1-6" the main battery consists of turrets of three guns each, they could be entered as 3x3-6". In this way, complete turrets (rather than individual barrels) would be eliminated due to damage.

La Argentina

Type: light cruiser
 Speed: 31 knots
 Displacement: 6000 tons

Guns

Main battery: 9 x 1 - 6"
 Secondary battery: 4 x 1 - 4"
 Torpedo tubes: 6

Armor

Belt: 3"
 Turret: 2"
 Deck: 2"

Airplanes

2

Mines

0

Ship value

23034

1 knot = 743 points
 1 main gun = 2559.3 points
 1 secondary gun = 5758.5 points
 1 torpedo tube = 3839 points

Software version 1.0.0

Damage List

743	30 knots	17833	7 knots
